SWYX
FLEX

The flexible license model with monthly billing

Swyx Flex enables all telephony functions to be rented on a monthly basis and operated flexibly on an own server. Due to the included software updates, the solution always remains up to date.

Swyx Flex summarizes the functionality of the Swyx solution in three easy to offer feature profiles. Profiles can be booked individually for individual users. Always included are telephone system and UC functionality including desktop clients for Windows and macOS, Call Routing Manager, presence information, messaging, Outlook integration, CTI, voicemail, ad-hoc conference function.

Swyx Flex also offers full flexibility in billing and usage: Profiles can be adapted to the user behavior during the term of use.
